Working Experience

IT Business Analyst

I Can Read Pte Ltd | Sept 2023 - Present

- Analyze business needs and requirements for the company's SAAS product.
- Collaborate with stakeholders to gather and document detailed requirements
- Utilize UI/UX knowledge to actively contribute to the design and improvement of user interfaces for optimal user experience.
- Develop wireframes and prototypes to visualize and iterate on UI/UX designs, aligning them with business goals and user expectations.
- Work closely with regional cross-functional teams, including developers and stakeholders, to ensure seamless integration
- Conduct usability testing to gather feedback and refine designs, optimizing the overall user experience and functionality of the product.
- Create detailed documentation of business requirements, technical specifications, and UI/UX design elements, ensuring clarity for all stakeholders.
- Stay updated on industry trends and emerging technologies, bringing innovative UI/UX ideas to enhance the SAAS product's digital experience.

Front End Developer

GrowthOps Malaysia | Apr 2021 - Aug 2023

- Work with the design team to create wireframes, mockups, and design concepts for the new website
- Develop the frontend code for the website using HTML, CSS, and JavaScript
- Implement the website design using AEM, which may involve creating templates, components, and pages.
- Ensure that the website is optimized for performance, accessibility, and SEO.
- Do testing on various devices and browsers to ensure it is mobile responsive and user friendly.
- Collaborate with other stakeholders, such as project managers, business analyst, and UI/UX team, to ensure that the website meets all project requirements.
- Provide ongoing support and maintenance for the website, including fixing bugs, updating content, and making design and functionality improvements.

IT Support Engineer

IBM Malaysia | Dec 2018- Apr 2021

- Respond to customer inquiries through phone, email, or chat in a friendly and professional manner, providing excellent customer service at all times.
- Troubleshoot technical issues efficiently and effectively, ensuring that customer problems are resolved in a timely manner.
- Provide clear and concise technical guidance to customers, explaining technical concepts in non-technical terms to ensure their understanding.
- Collaborate with cross-functional teams to identify and resolve customer issues, working together to ensure customer satisfaction.
- Maintain accurate records of customer interactions, including details of inquiries, comments, complaints, and actions taken, to facilitate ongoing improvements in customer support.

Application Support Engineer

SL Information Sdn Bhd | May 2018 - Nov 2018

- Provide support for ERP software to ensure that it runs efficiently and effectively.
- Perform in-depth analyses of software application functionality to ensure that it is working correctly.
- Establish the root causes of application errors, working to find solutions that will prevent these issues from recurring in the future.
- Replicate issues to find the root cause, testing and troubleshooting the software to ensure that all issues are identified and addressed.
- Collaborate with the development team to communicate and prioritize issues, ensuring that fixes are implemented in a timely and effective manner.
